

Barco

Provider of cost-effective visualization solutions

Barco is a recognized international leader providing high-performance display systems and image processing sub-systems for high-integrity aerospace applications. Building on decades of experience, Barco provides a complete family of cockpit display products, ranging from Mission Displays up

aerospace manufacturers, including Honeywell, Thales, L3, GE Aviation, Boeing, Airbus, Sagem, EADS, Eurocopter, AgustaWestland.

A strong emphasis on service and support is a cornerstone in Barco's customer commitment. For that purpose, Barco has set up a worldwide network of research, development and support services.

Recent innovations include the CDMS-3000, a brand-new generation of Control Display and Management Units. The CDMS-3000 represents a new level of flexibility for our customers. Thanks to the unique, Modular Open System Architecture (MOSArt™), system integrators can easily develop and integrate their own FMS application, or any

other application, on the powerful CDMS-3000 unit.

Also new is the CHDD-268 Primary Flight and Mission Display featuring a user-friendly Touch Screen option. As an industry first, the CHDD-268 succeeds in combining the functionality of an advanced Touch Screen device with first-class optical performance, in high brightness environments as well as night vision applications.

to Control Display Units and safety-critical Primary Flight Displays.

Barco's commitment to quality has earned the trust of the world's leading
