

HEATCON® Composite Systems Solutions that Define our Customers' Success

In today's world, the use of composite materials is becoming commonplace for many major manufacturers and end users. Composites are lighter, stronger, and more durable than traditional materials; however, the repair process requires much more sophisticated procedures.

Even with these complexities, a proven company can provide the necessary training, equipment, accessories and materials (TEAM) to easily repair these unique composite structures. But, don't just partner with any company for your repair needs, partner with a company that sets industry standards in a global marketplace and leads the industry in delivering innovative solutions for repairing composite structures. That company is HEATCON® Composite Systems!

Since 1981, HEATCON® has been providing a customer-centric TEAM approach to meet the needs of all our industry partners. We have the most innovative products and solutions in the composite repair industry.

Our equipment is second to none and is certified by some of the most rigorous environmental, electrical, and physical testing systems available today. All components are carefully selected to ensure fail-safe, reliable operation. As the supplier of choice for major manufacturers, military and repair organizations, we have built a reputation of excellence within the composite repair industry. We provide the products and solutions that work right the first time, every time!

With almost 30 years of technological innovations and experience in the

composite repair field, HEATCON® is now providing solutions such as wind blade repair for the wind energy industry and advanced composite repair for the motorsport industries. Also, as an ISO 9001:2000 certified manufacturer, we provide you peace of mind in knowing that we are committed to excellence and to continual quality improvement in all aspects of our business.

From training to equipment, accessories to materials, and with offices around the world, we are the "one-stop-shop" for all your composite repair needs. We can literally put you into the composite repair business with the most comprehensive products and solutions within the industry.

Let us become your composite repair industry partner! Your success, defines our success!
