Precision Heliparts (PHP)

Precision Avionics & Instruments (PAI)

Precision Heliparts Canada (PHP-C)

Precision Accessories & Instruments (PAI-C)

"Others sell parts, WE SELL SUPPORT"

Precision Aviation Group (PAG) is the exclusive provider of ISMRO® (Inventory Supported Maintenance Repair and Overhaul) and supplies components and value-added products to the worldwide aerospace and defense industry. PAG was founded in 1993 with Precision Heliparts (PHP) and in 2002 opened Precision Heliparts-Canada (PHP-C) in Vancouver, BC. PAG acquired Precision Avionics & Instruments (PAI) in 2005 from Dallas Airmotive and acquired Pegasus Aircraft Components to launch Precision Accessories & Instruments (PAI-C) in 2007. PAG is a premier MRO facility and carries unlimited instrument, avionics and accessories ratings from the FAA. PAG also maintains EASA and TC certifications.

During 2008, PAG continued to expand, adding 12,000 square feet to the company's sales and service areas in the Atlanta, Ga. facility and consolidating its Canadian operations into a new 15,000 square-foot facility in Vancouver, BC. In 2009, PAG hired Chris Van Wyhe as VP & general manager of the Canadian operations and Phillip Fienen as regional sales manager for all four companies.

PAG continues to grow — adding technicians, sales staff and new MRO capabilities to meet the needs of cus-

tomers all over the world, spread around 62 different countries.

ISMRO

Simply put, ISMRO® is the combining of the

traditional parts distributor functions with repair station functions and is the new model for parts support providers. Like a traditional parts distributor, PAG companies are distributors for many brand-name instruments including Mid-Continent, RC Allen and United, as well as electrical accessories such as Globe and AAE, to name a few. However, unlike the traditional parts distributor, PAG also provides extensive repair & overhaul capabilities, including accessories, avionics and instruments. Our facilities in Atlanta, Ga. and Vancouver, BC contain over 75,000 square feet and 92 employees.

PAG Supports These Manufacturers

- Agusta
- Pratt & Whitney
- Embraer
- Hawker/Beechcraft
- Fairchild/Metroliner
- CASA
- Eurocopter
- Bendix King
- Sikorsky
- Bell
- DeHavilland
- ATR
- Bombardier
- Cessna
- Piper
- MD
- Goodrich
- Rolls-Royce

Repairs, Overhauls & Spares

PAG processes thousands of accessories, items for repair/overhaul each year. Our technicians average more

than 12 years experience in the general aviation field, and our sales team members average more than 14 years of service experience. PAG has a long history of expertise in repairs management, its employees have extensive knowledge of the industry and it has built strong relationships with OEMs and repair stations. This allows PAG to reduce turnaround times, and lower customers' repair costs.

PAG maintains an inventory of more than 50,000 line items to support its customers. The company is an authorized distributor for many manufacturers and distinguishes itself by providing technical expertise and exceptional customer service.

The expertise and skill of PAG's highly trained technicians provide solutions to a variety of repair problems. With overhaul/repair capabilities on more than 8,500 items and five separate shops totaling more than 20,000 square feet, the company specializes in the overhaul of accessories, avionics and instruments.

Need AOG Services?

PAG maintains more than 50,000 line items in stock and ready for immediate shipment to get your aircraft flying again. Want contract pricing for repairs and guaranteed exchange availability for components? PAG does that. Need to buy spares or lease a spares box? PAG has it covered. Both Atlanta and Vancouver are international and domestic hubs with direct flights to more than 200 cities in North America and the world.
