

## StandardAero

StandardAero, a Dubai Aerospace Enterprise (DAE) company with \$1.4 billion in annual revenue, specializes in engine MRO and nose-to-tail services that include airframe, interior refurbishments and paint for business, air transport, and military aircraft. The company, part of the DAE Engineering division, forms a global network of 12 primary facilities in the U.S., Canada, Europe, Singapore and Australia, with another 14 regional service and support locations. StandardAero services engines used on corporate and government/military aircraft, commercial airliners and helicopters, including the PW100/600, PT6A, TFE731, Model 250, T56/501D, AE3007, AE2100 and CF34.

The company performs airframe work ranging from standard inspections to major alterations. All facilities are FAA-certified repair stations and have airframe capabilities related to the needs of their respective geographic locations. Services are provided for Airbus, Boeing BBJ, Bombardier, Dassault, Hawker and other popular business jets.

Avionics capabilities include: FAA Designated Alteration Station; FAA Delegated Engineering Representatives; Class 1, 2 & 3 Radio and Class 2 & 3 instrument ratings.

With more than 50 years of experience, the company offers interior and exterior redesign services, including interior refurbishments and state-of-the-art exterior paint capabilities for a wide range of business aircraft.

Strategically located Mobile Service Teams provide customers with greater flexibility, while reducing costs and downtime. They are available 24 hours

a day, seven days a week. The teams are equipped to handle troubleshooting for both engine and airframe maintenance.

Associated Air Center is world renowned for its custom-designed and crafted interior completions, MRO services, engineering and certifica-

tion. A world leader in the maintenance and modification of large transport category aircraft, clients include internationally known individuals, corporations and heads of state.

For over 50 years, StandardAero has been a leader in engine maintenance for military and commercial aviation. We're known for our innovation and the efficiency of our work processes, helping to minimize costs and downtime. Now, we've joined forces with Laramark Aviation's MRO services, allowing us to provide a global level of capabilities and service to business aviation.
